Question

Interest
   effect will go into play.
overall model of equipment
   Standardization to ts
inner workings are new
Jan, Feb.
Computerization
ADP.
Module

smaller,
   Modulation
Silver — color.
smaller, more compact,
modular,
   Soviet targeting will be
up - monitoring

currently ongoing process
testing phase is completed

②

will be several of these
Modules inside is the
difference —

ADP will be able to take
info faster

Signal
data flow inward

Signal communication

Red lines across the
computer screen

Cusps . ——

Rider —

the extreme of the
System — that the Soviet
are going for .

Rider prefers to see bigger
p
enhance - scope at faster
difference

③ The Rider System
goes into effect close to
X mas time frame

enables men who watches

gain ~~faster~~ rates of activity

System is excellent as a
" vessel "

info comes in but can
send info out

Satellite involved
Very modern - molecular
ADP - in and out
must be accomplish soon.
use for conventional warfare
can take out of Vessel and
use ~~put~~ elsewhere -
because of small size

(4)

radioactive particles —
emitting
- Name:
   Eastern Block Country-
officials - counter part

Donnes
Dawnen

Gollie - Golie Donnen.
counter parts to the donim
info shared with U.S.
can be found in European center.

Eastern Block person

- Reactos
   Radio Active particle

Scientific orientation toward
this equip in Soviet -
at higher Scient. level
Before given to Navy

(5)

This is
last minute decision
decision to use on Navel Vessel
very political
S.G. not sure whether to
use it a not.
last decision - political
? why politically Sensitive

B/Meuter

Meuther

Scientists Love this
Shaw program.

decision to use political
was - S.U. interest -
other countries
new tactics
had something to do with
Afghanistan.

6

Reason for
Because Reactor - to locate
Super find - to

Super intelligence
trying to work thru stuff
Intel nets.

Receive Signals

Artifficial Intelligence
able to find out -
sattelite countries
trying to find info on. Countries
not close to him -
mechanics - mechan
Artificial Intele technique
Info in Chinese
Chinese getting more scientific
now.

(7)

Chinese Launch pads.
what Chinese doing with
southern neighbors

Soviet realize that going into
country and taking over - not good

collecting scientific development
of other countries (China)
and their interest in Space.

can locate certain Reactors
in other countries -
Collect and will Know.
how far advanced others are
helps in political game.

System will go into Submarine
modules - and can be used
elsewhere.
?. Why in Sub?
this Sub moves faster - test purpose

the move if gets made it do

⑧ thing they did not want

it's shelved -

? equip to control Sub. or
collect data ?

after decision to put in Sub -
it was shelved -
Can work other places

? What Kind of info

— Signal waves
— Strands
— Signal Intellige
wanting to know what
nuclear reactor are

Soviets install to Locate
N. Reac. + gather
info on launch pads

They can detect when +
where nuclear warheads
are put on —

They can determine if
there in Nuc. Warhead on.
— data on __where__, how
many.

can monitor how many
more - and

? __Whose__ ?

~~They~~ __Chinese__

- Mueller   - System
- Mueether

Bilter
Rotary
   System - (modular system)

No Blue

no.. purple

yr Orange

yrs. peal

no Green.

yes red

Same type of info on Rotary

— Augsburg

— East Berlin

Germany has the info —
that U.S. Naval people will be
able to receive

partly thru gen samson

division

divising of methodology

a piece here, there

Gabbe comes into

play —

— check in with sources in Germany.
Meuther — East German.

who will be able to satisfy

markets —

involved in Production of Rotary

Engine —

(11)

designed by Soviets

East German -
    possess technical skill also
they have the modules -

Soviets designed it .
But ~~to~~ gave each
country - given a part
to build - then gathered
together in Soviet Union
and put together —

Specifics on 9
    mechanical
    radiating (Richer) Beams
crystaline forms .

Cryptals —
